Terrorism or Israel's Enemies?

"The biggest threat, however, is Saddam Hussein and his weapons of mass destruction. He can blow up Israel and that would trigger an international conflict."

President George W. Bush, just months before the attack on Iraq.

Plan of Attack (Simon & Schuster, 2004), p. 186.

Saddam possessed no weapons of mass destruction and Iraq posed no direct threat to America; they did however pose a threat to Israel.

Influential Zionists in our own media and government lobbied for the war from day one, even feeding false information to our intelligence agencies.

Now American soldiers are being killed so that Israeli soldiers won't have to fight their enemies for themselves.

Let Israel fight its own wars!
